

Sock clip is designed and manufactured in Finland.

Particular attention has been paid to its design and technical implementation to make it easy and quick to use.

The Sock clip is made of polypropylene (PP), which is a recyclable material. Polypropylene is a tough and durable plastic with a melting point of about 130 degrees.

Maximum temperature to use: 80 Celsius.

Sock clip dimensions: weight 3,2g/pcs, size 40 x 25 x 10 mm.

Sock clip is UV-protected against the effects of the sun.

Sock clip is patented.

Sock clip is a registered trademark ®
